

NICHOLS PLUMBING & HEATING LTD

PLANT ROOM SPECIALISTS

Precision. Quality.
Every Installation.

OUR PLANT ROOM WORK

Engineered with precision · Built to last · Designed to impress

At Nichols Plumbing & Heating Ltd, every plant room we design and install is a direct reflection of our standards. When you receive a quote from us, you can see exactly the level of work you're going to get. Because we show you.

We believe a plant room should be something to be proud of. Neat, logical, fully supported pipework. Quality components from leading brands. A system that is built correctly from day one. Designed to run efficiently and simple to maintain.

Whether it's a domestic renovation or a complex multi-zone heating system, we bring the same level of care, planning, and craftsmanship to every single project.

WHAT WE DELIVER AS STANDARD

Our commitment on every plant room installation

Neat, Planned Pipework

All pipes routed parallel, level and symmetrical. Planned before the first length is cut.

Premium Components Only

We specify Vaillant, Grant, Tempest, Honeywell and other industry-leading brands as standard.

Accessible for Future Servicing

Valves and components are positioned so your engineer can work efficiently for years to come.

Fully Supported & Clipped

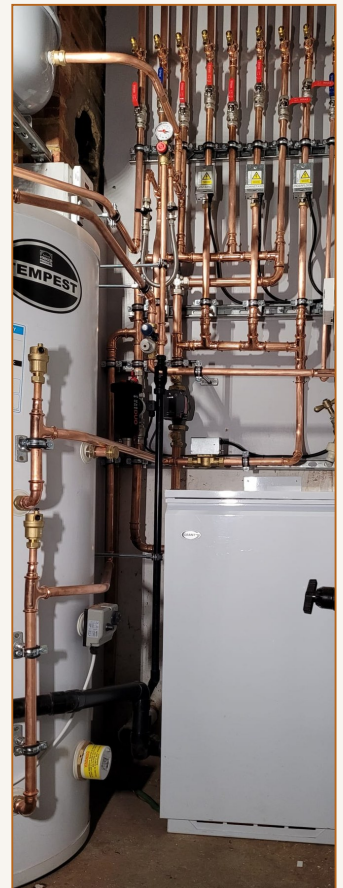

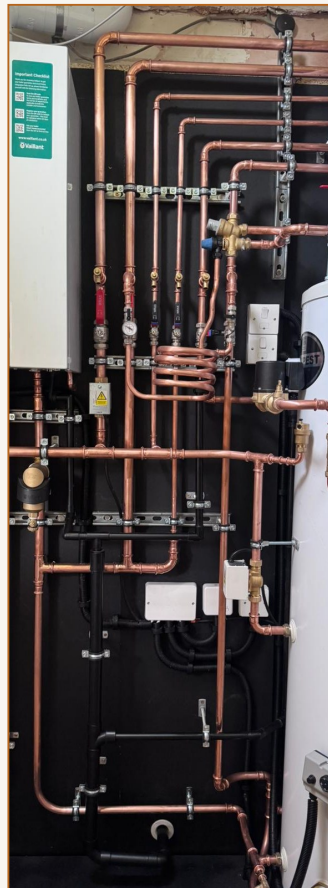

Every pipe properly clipped at correct intervals, bracket mounted and secure throughout.

Pressure Tested & Signed Off

All systems are pressure tested and signed off before handover. Zero shortcuts, every time.

Clean, Tidy & Professional Finish

We leave every plant room clean and ordered. The quality inside the cupboard matters too.
